Plainpages.org: the solution to transparent plain language services

Tanielle Price MS, CHES, Kristie Hadden, PhD, Heather Mercer, Philip Walter
Center for Health Literacy, University of Arkansas for Medical Sciences, Little Rock, AR

BACKGROUND

Health literacy is a common problem in the U.S., affecting over 80 million people (1). While health literacy is a complex concept that includes many components, print prose and print document literacy are two skills that are essential for health literacy so that patients can understand written health information (2). Written health information can be found in all areas of health and includes medical instructions, prescription medication information, health education about diseases, behaviors, and/or treatment options, patient history and admission forms, informed consent materials, and many other examples. It is well documented that there is a mismatch between the typical reading level of written patient health materials, and the average reading skill level of patients (3-5). Health professionals often lack the skills and financial resources to assess and edit these materials. PlainPages.org is a web portal with transparent pricing where such professionals can upload health related documents for plain language assessment and editing. After they uploading a document, a quote is returned with specific pricing and a guaranteed return date. PlainPages.org provides its affordable plain language services through the UAMS Center for Health Literacy Plain Language Program.

MISSION STATEMENT

The mission of plain pages and the UAMS Center for Health Literacy is to improve individual, provider, systems and community health literacy at the local, state, and national levels in order to improve health outcomes and population health.

PROJECT DESCRIPTION

PlainPages.org: Making health information simple

We turn confusing health-related documents into simple, effective tools that are easy to understand.

PlainPages.org is a web portal with transparent pricing where such professionals can upload health related documents for plain language assessment and editing. After they uploading a document, a quote is returned with specific pricing and a guaranteed return date. PlainPages.org provides its affordable plain language services through the UAMS Center for Health Literacy Plain Language Program.

1. A health- related document is uploaded for assessment and/or revisions
2. A quote based on our transparent pricing is given
3. Documents are assessed and edited
4. The documents are returned with an assessment and suggested edits

OUTCOMES/IMPACT

PlainPages.org will provide health professionals across the US access to affordable plain language services. Hundreds of pages of written health information will be improved for dissemination to patients and the public for better understanding. PlainPages.org will improve written health information for health professionals, patients, and the public, making it easier for people to understand what they need to do to be healthier.
